

Reza Fahmi Pahlevi

Purwokerto, Jawa Tengah, Indonesia | [+62 877-1513-7752](tel:+62877-1513-7752) | [Email](#) | [LinkedIn](#) | [Portofolio](#)

Detail-oriented QA Automation Engineer with a Bachelor's Degree in Computer Science and hands-on experience in executing end-to-end testing lifecycles. Proven technical proficiency in building robust automation frameworks using Java, Selenium, and REST Assured, alongside mobile testing experience using Appium. Adept at managing dual-internship responsibilities, validating complex API endpoints, and executing backend data verification to ensure high application reliability.

EDUCATION

Dibimbing.id | [Certificate 7](#)

Quality Assurance Batch 3 | Grade: A+ (Score: 94.18/100)

2025 – 2026

- Awarded as [2nd Runner-Up Performer](#) across the entire Quality Assurance cohort for outstanding academic record and technical capstone performance.
- Mastered QA fundamentals, including test scenario design, structured defect reporting, and cross-platform exploratory testing.
- Gained hands-on experience in building web automation scripts (Selenium), API test suites (REST Assured), and mobile automation scripts (Appium).
- Performed backend data verification using Postman and SQL queries, alongside performance bottleneck analysis using JMeter.

Bachelor in Computer Science, [Universitas Muhammadiyah Purwokerto]

2021 – 2025

- GPA: 3.64/4.00 | Relevant coursework: Database Systems, Software Engineering, Information Systems.
- Applied SQL queries for data accuracy verification during academic development projects.

WORKING EXPERIENCES

Quality Assurance Intern (Bootcamp Apprenticeship), PT Digital Solusi Group June 2026 – Present

- Conducted system onboarding and product ecosystem mapping across 3 core web platforms, including an internal back-office administration system, a company profile, and an external hotel booking application.
- Mapped core functional requirements and independently designed 80 comprehensive test cases (58 for back-office operations, 15 for external bookings, and 7 for company profile) to establish a baseline for sprint testing.
- Identified and logged 8 functional and layout defects through structured reports, collaborating closely with the mentor to refine internal workflow coverage.

Quality Assurance Intern, PT Hama Smart Solution

April 2026 – Present

- Executed fast-paced, risk-based exploratory testing within tight 1-week sprint cycles, ensuring functional consistency across 4 distinct commercial platforms (Web, Mobile, Desktop, and Chrome Extensions) prior to release.
- Validated backend API data integrity testing 25+ Postman endpoints, with 17 critical endpoints dedicated to complex Stripe payment gateway transactional workflows.
- Executed 30+ targeted PostgreSQL queries (focusing on 20+ payment-related queries) across multiple relational tables to perform backend data integrity verification.
- Conducted concurrency testing using JMeter on critical payment race scenarios (payment processing vs. dunning lifecycle), successfully uncovering a high-priority edge-case defect where dual-execution occurred simultaneously.
- Delivered comprehensive bug reports equipped with database logs and Postman execution traces, significantly streamlining developer defect tracking and hotfix resolution.

Full Stack Developer, PT Kinema Systrans Multimedia

February 2024 – June 2024

- Designed and conceptualized user interfaces (UI/UX) using Figma, focusing on user-centered design, intuitive user flows, and cross-platform usability guidelines.
- Translated high-fidelity UI/UX designs into responsive web components using React.js and Tailwind CSS, ensuring layout consistency and optimal performance across various screen sizes.
- Conducted self-testing during the development phase to catch styling defects, layout shifts, and component rendering issues prior to internal handovers.
- Collaborated within sprint cycles alongside cross-functional teams to refine application features, gaining deep insights into front-end architecture to optimize UI element automation.

PROJECT

QA Automation Capstone Project: Resonance Platform | [Dibimbing.id](#) | [GitHub Repo](#)

2026

- Designed and implemented a modular hybrid E2E automation framework from scratch using Java, Selenium, REST Assured, and Maven, utilizing Clean Code and Page Object Model (POM) architecture.
- Automated 30+ UI test scenarios across 3 core modules and 15+ backend API endpoints, matching manual test specifications while achieving significantly faster execution speeds via parallel test execution.
- Validated complex API response payloads, backend data integrity, and edge-case status codes within automated test execution cycles.

Mobile Automation Project: Saucedemo App | [Dibimbing.id](#) | [GitHub Repo](#)

2026

- Developed a mobile automation framework using Appium, Java, and Gradle to execute functional testing on Android 16 environments.
- Fully automated end-to-end user journeys from authentication, product selection, and cart management to completed checkout workflows.
- Configured automated logging and screenshot utilities upon execution failure to accelerate debugging efficiency for identified defects.

Final Project: Dibimbing LMS | [Dibimbing.id](#) | [GitHub Repo](#)

2026

- Formulated a comprehensive Test Plan for 30+ UI and API manual test cases, prioritizing high-risk core features to ensure maximum coverage within strict delivery timelines.
- Built a Java & Selenium web automation framework covering critical E2E happy path workflows, securing sensitive credentials using .gitignore for security compliance.
- Integrated automated Slack notification hooks to generate real-time execution reports and test results directly to stakeholder channels.

ORGANIZATIONAL EXPERIENCES

PKKMB Committee, Universitas Muhammadiyah Purwokerto

July 2023 – September 2023

- Led logistics coordination for a university-wide orientation event serving approximately 2,000 incoming students, ensuring smooth execution across all operational areas.
- Prepared logistics documentation and reports to support accountability and post-event evaluation.
- Collaborated with multiple internal divisions to ensure timely setup, smooth event execution, and efficient logistical flow throughout the program.

SKILLS

- **Testing & QA:** Manual Testing, Test Case Design, Functional Testing, Exploratory Testing, Regression Testing, API Testing.
- **Automation:** Selenium WebDriver, REST Assured, Appium, Katalon Studio.
- **Tools & Technologies:** Postman, JMeter, Maven, Gradle, Git, IntelliJ IDEA, Android Studio, VS Code.
- **Programming & Database:** Java, JavaScript, SQL, PostgreSQL.
- **Soft Skills:** Analytical Thinking, Problem Solving, Attention to Detail, Communication, Adaptability, Team Collaboration.
- **Language:** Indonesian (Native), English (Intermediate).
